

Virtually Connect U.S. and Indian Women Scientists!

Project Title	Virtually Connect U.S. and Indian Women Scientists!
Project Summary	Design, manage, and create content for a virtual network of U.S. and Indian women in the field of life sciences.
Country	India
Agency	Department of State
DoS Office	N/A
Post	NEW DELHI
Section	ESTH
Number of Interns	1

Project Description

Embassy New Delhi is looking for a motivated and digitally savvy student to create a virtual network for a select group of American and Indian women scientists in the field of life sciences. The goal is to facilitate peer networking and mentoring, forge professional ties, and discuss pertinent issues. The U.S. and Indian governments have prioritized promoting women in STEM, and one of the most effective ways of achieving that goal is by strengthening our people-to-people ties. In consultation with your supervisor, you will identify the ideal social media platform (Facebook, LinkedIn, etc...), and design the site. You will feed content to the site by highlighting relevant media stories and professional opportunities, and support discussion forums. You can also write your own content, for example you could write profiles of the women in the network. If you are creative, love working with social media, and passionate about promoting women in STEM fields, this is the internship for you!

Desired Skills Interests

Additional Information

While we are starting with life sciences, our hope is to begin small and then grow the network organically, and become broader and sector agnostic. Expected time commitment is about 1-3 hours per week except in the

initial stage, when it could be higher. At the close of your engagement, you will transfer the ownership and management of the portal to an Embassy-designated individual.
